THE FINANCIAL CRISIS OF CAPITALISM

BACKGROUND TO THE MELTDOWN: RECESSION AND ITS CONSEQUENCES

The United States economy is facing its greatest crisis since the Great Depression of the 1930s. Although much emphasis has been placed on "bad government" and "greed" as the cause of the financial crisis, the underlying causes of the crisis go much deeper into the exploitation of labor and the concentration of wealth in the hands of a few. This lecture will explore the causes of the crisis and the role of government in the economy, and the impact of the crisis on the lives of ordinary people.
